## MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

The planned Naval Aviation Shore Establishment, including Marine Activities, for the Fiscal Year 1960 is reflected in the assigned missions of individual activities. These missions are based on the Basic Naval Establishment Plan for Fiscal Year 1960 and may be modified as revised SECNAV NOTICES are issued. Assigned tasks to accomplish the listed mission are promulgated by BUAER NOTICES (Series 5451) which supersede the OPNAV NOTICES for each activity. The "units/activities to be supported" by individual activities are designated by the Chief of Naval Operations and will be listed in the appropriate BUAER NOTICE 5451 and as shown herein. The eventual planned pre-D-Day base capacity for each activity is contained in OPNAV INSTRUCTION 0011010.10B of 11 June 1958 or revisions. Permanent duty stations of Naval units are contained in the effective edition of OPNAV INSTRUCTION 3114.14.

### OLF

In the following tabulation of bases and satellite fields, an Outlying Field (OLF) is an airfield having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations in this document for the purpose of providing a landing area whereon aircraft based at established Naval air installations can conduct landing practice or other exercises which are best conducted away from the parent installations. An OLF is under the cognizance of a nearby parent air station to which are allocated minimum funds for the maintenance of the OLF. No personnel are based at an OLF.

### ALF

An Auxiliary Landing Field (ALF) is an airfield having some facilities in operation in addition to a landing area. It is designated as such by the Chief of Naval Operations for the purpose of providing an airfield at which aircraft based at established Naval air installations can be refueled and/or rearmed for the conduct of gunnery practice. The facilities which are in operation, in addition to the landing area, may include several or all of the following: minimum personnel berthing and messing facilities, air traffic control, communication, crash and rescue, refueling or rearming equipment. An ALF is not a separate established Naval activity, and therefore is not listed in the "Catalog of Naval Activities." It is under the cognizance of a nearby parent air station to which are allocated minimum personnel, funds and equipment for its support. The parent air station may maintain a small caretaker detachment at an ALF.

### AIRCRAFT

Aircraft assigned to activities are planned assignments, and will reflect normal types and numbers of aircraft based on a given activity. Aircraft and unit deployments can be determined from OPNAV NOTICE P03110 (Blue Book). Aircraft assigned to O&R facilities and BUAER aircraft storage pools are omitted and can be found in the Blue Book.

### PERSONNEL

Personnel figures for Naval, Coast Guard, and Air Force units reflect beginning FY 1960 authorized billets. Numerical allowances for Marine Corps units are based on Tables of Organization for Fleet Marine Force units, and on Tables of Organization and/or Navy Manpower Authorization Allowances for Non-Fleet Marine Force Units. In order to determine approximate on board strengths for Fleet Marine Force Units, percentage manning should be applied as follows: Aviation units, officers aviation 80; non-aviators 65, and total enlisted 80; Ground units, officers aviators 80, non-aviators 95, and total enlisted 95. The on hand strengths of Non-Fleet Marine Force Units should approximate their Table of Organization and/or Navy Manpower Authorization Allowances.

Figures in parenthesis are shown for information only and are reflected in parent activity totals.

Personnel data for USNR/USMCR Squadrons/Units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

Mission: Train aviation medical personnel and perform research in the field of aviation medicine, aviation psychology, and allied fields.

The School of Aviation Medicine, under the administrative control of the Chief of Naval Air Training, indoctrinates an average of one hundred and thirty (130) flight surgeons a year. Academic studies are directed toward the medical problems peculiar to naval aviation, aviation safety and aircraft accident investigation. In addition, primary flight training in the T-34B, through solo, familiarization flights in all phases of naval aviation, plus indoctrination flight training in helicopters is presented to broaden the medical officer's understanding of aviation medical problems. In addition, the School conducts such research projects in the field of aviation medicine as are assigned by higher authority. The School conducts 2 and 3 year residency and additional work in aviation physiology.

NAVAL AIR TECHNICAL TRAINING COMMAND

Location: NAS Memphis, Tennessee.

Mission: To coordinate and direct all Naval and Marine Corps air technical and specialized aviation training and such other training as may be assigned at such activities as are placed under the cognizance of the Chief of Naval Air Technical Training.

Programs:

I. By the above mission, the Chief of Naval Air Technical Training is assigned the responsibility for training those naval aviation personnel who keep naval aircraft flying. The training programs set forth below are in effect to fulfill that responsibility.

a. Class "A" Training

The basic knowledge and skills required for performance of the duties of lower rated petty officers are acquired by personnel through Class "A" training. Fourteen such schools are in operation, eight of which offer specialized courses to train personnel in Rate (i.e., AD, ADR, ATN, ATR, etc.).

AD Aviation Machinists Mate	PH Photographers Mate
AE Aviation Electricians Mate	PR Parachute Rigger
AG Aerographers Mate	TD Trademan
AK Aviation Storekeeper	AQ Aviation Fire Control Technician
AM Aviation Structural Mechanic	GF Aviation Guided Missileman

b. Class "B" Training

Class "B" training prepares personnel for advancement to PO-1 and CPO through instruction in the requisite higher level skills and knowledge. Eleven such schools are in operation.

c. Class "C" Training

Class "C" training prepares personnel in a particular technique or on a specific item of equipment to meet a short-range requirement. Because of the functional nature of the training, the number of Class "C" Schools or Courses in operation varies; however, twelve are presently in operation.

AQ Conversion	Instructor Training - Memphis
Camera Repair	Instructor Training

d. Class "O" Training

The purpose of Class "O" training is to prepare officers to fill specialized technical aviation billets or CIC and Air Control billets in the Naval forces. Fourteen such schools are in operation. Ten of the major schools are listed below.

Air Traffic Control Officers	CIC Officers
Aviation Electronics Officers	Naval Aviation Observer (Controller)
Aviation Ground Officers	Photo Officers
Aircraft Maintenance Officers	Photo Reconnaissance Officers
Advanced CIC	Naval Air Weapons System

e. Naval Air Mobile Training

This specialized training of a nature similar to Class "C" is provided at the field location where the training requirement exists through the use of a self-sufficient technical school providing, insofar as practicable, a complete maintenance training unit. Naval Air Mobile Trainers (NAMT's) are of four basic types:

- (1) NAMT(M) - Maintenance of specific models of aircraft and related equipment.
- (2) NAMT(MOR) - Familiarization and instruction in the operation and handling of aircraft munitions (including air-launched guided missiles) and allied equipment.
- (3) NAMT(OF/WST) - Operational flight/weapons systems trainers.
- (4) NAMT(ABC) - Atomic, Biological and Chemical Defense.

Further, trainers are classified as being in either Class "A" or Class "B" status, the essential difference being that Class "A" trainers are manned by NATECHTRACOM personnel and Class "B" trainers by local personnel.

II. Training programs in effect provide for annual inputs as follows:

a. Formalized Schools/Courses

<u>Class</u>	<u>USN</u>	<u>USNR</u>	<u>USMC</u>	<u>Other Service and Foreign</u>

GROUND CONTROLLED APPROACH UNITS

Ground Controlled Approach (GCA) is a radar talk down system providing range, azimuth and elevation information to enable a controller to assist a pilot to a landing under weather conditions approaching zero visibility and ceiling. Radar Air Traffic Control Centers (RATCC) are to insure the "round the clock" assistance to air movement of aircraft to and from federal airways, off airways, seaward operating areas, and around naval air activities.
